

## Wood batching device

- » Fully galvanized version
- » With Euro mounting
- » Batch, transport, set down, load and unload – all with the batching device
- » In just a few minutes, 1 m<sup>3</sup> of wood can be processed into firewood with a chain saw
- » Side plate can be used on the right or left
- » Different sizes of wood are possible
- » Safe working
- » Saves time – no helper required

Batches can be conveniently loaded  
with front loader  
Pick up wood bundles with front loader

The wood can be cut directly on  
the batching device through gaps  
(330, 500 or 1000 mm)

Professional batching directly on the device  
with wrap-round strap
