

Hydraulic rear and high-tilt bucket

Folding wall, 1100 mm deep, 525/580 mm high

- » Fully galvanized version
- » With three-point hitch cat. II and Euronorm as standard
- » Very large holding capacity
- » The particularly flat tray makes it especially easy to pick up bulk materials such as gravel, sand, silage or feed (also suitable for clearing snow)
- » The pivot point is oriented towards the front and thus ensures higher tipping discharge of the material
- » Especially rugged design
- » The innovative cylinder deflection allows the vertically installed hydraulic cylinder to achieve a tilt angle of approx. 65° and a compressive force of approx. 3.5 tonnes, tensile force 2.2 tonnes
- » 1 x double-acting hydraulic connection required
- » Includes hydraulic couplers and hoses

Triangle peaks (retrofit kit)

Art.no.	Product name	Version	Width	Weight approx.	Qty.
HSHFLM150005V	Hydraulic rear bucket, including folding wall	Galvanized	1500 mm	390 kg	Pcs.
HSHFLM180005V	Hydraulic rear bucket, including folding wall	Galvanized	1800 mm	420 kg	Pcs.
HSHFLM200005V	Hydraulic rear bucket, including folding wall	Galvanized	2000 mm	440 kg	Pcs.
HSHFLM220005V	Hydraulic rear bucket, including folding wall	Galvanized	2200 mm	460 kg	Pcs.
In this way you can turn your rear bucket into a high-volume bucket – folding wall version
