- » Forklift mounting:
Pocket dimensions: 152 mm x 72 mm
- » 3-blade, especially strong mixing springs
(angle is adjustable)
- » Side wall scraper, discharge chute in the rear
- » Drive shaft with overload protection
- » Gearbox: 2-stage, translation ratio: 1:11
- » Pre-coated and 2 K-painted
- » Agitator has triple bearing
- » Extra heavy safety grid
(agitator can be sealed off)

Features:

- » Adjustable side wall scraper
- » Lower link mounting Cat. II with 3 possible settings
- » Drum made of high-quality steel, star-shaped reinforced bottom
- » Mixing elements have long-lasting bearings, protected against dirt
- » Agitating tool made of wear-resistant high-tensile steel
(adjustable laterally and downwards)
- » Water supply through hollow space on the safety grid
- » Heavy safety grid
- » Discharge slide in the rear (especially well sealed and smooth running)
- » Use of special materials (fine-grain steel)

Mix Master Garant 401 SS

Output per hour: approx. 7 cbm
Power requirement: from 40 hp
Filling diameter: 1100 mm

Mix Master Garant 602 SS

Output per hour: approx. 10 cbm
Power requirement: from 50 hp
Filling diameter: 1200 mm

Mix Master Garant 802 SS

Output per hour: approx. 12 cbm
Power requirement: from 80 hp
Filling diameter: 1500 mm

Mix Master Garant 1002 SS

Output per hour: approx. 15 cbm
Power requirement: from 120 hp
Filling diameter: 1800 mm

For attachment to three-point hitch
