

Silage grab adapter with quick exchange device

This adapter enables existing buckets and forks to be equipped with a grabbing unit, avoiding the extra cost and space requirements of additional attachments. With Euronorm mounting directly on the front loader, the bucket/manure fork is then attached in front of the adapter. The grabbing unit opens up fully vertically, enabling large quantities to be picked up. The two cylinders ensure even pressure. A double-acting controller is required for operation.

- » For all types of buckets and forks
- » Quick and easy mounting
- » With Euronorm mounting as standard (on the attachment and tractor)
- » Welded-in tapered bushings
- » Front loader tines (M22 x 1.5 mm) 810 mm long
- » Sturdy grab-arm linkage
- » Includes hydraulic couplers and hoses
