

## Hydraulic gripper

- » Made of high-grade fine-grained steel
- » Ideal for all front loaders, loaders, loading cranes, etc.
- » Opening width approx. 1300 mm (narrowest diameter 10 mm)
- » Largest diameter with gripper closed approx. 400 mm
- » The double-acting hydraulic cylinder achieves a very high clamping force by means of deflection
- » Shank width approx. 264 mm
- » Net weight: approx. 100 kg
- » Optimally suited for loading logs, etc.
- » Includes hydraulic couplers and hoses

Illustration with rotary motor

**Optionally available with weighing system – see the weighing technology section in our main catalogue. Please enquire!**

We also offer matching electromagnetic switching valves for a 3rd and 4th oil circuit. No additional control valve is required for the gripper or rotary motor with this solution.
